

# HYDRAULIC HOSE

High quality spiral and wire braid hose for industrial applications

ALWAYS A RELIABLE PARTNER

ALWAYS A RELIABLE PARTNER

---

## We help you grow your rubber hose market.

---

From start to finish, we support our customers as a competent, reliable and experienced partner, actively contributing the know-how of an industrial company that has been successful in the market for over 20 years.

JYM'S universal hose range meets the ISO, EN, SAE International Norms, while the extreme hose range is designed to meet special performance requirements in OEM severe applications.

Our clear dedication to expand our operations throughout the world, with the aim of strengthening our position as one of the leading manufacturers of steel-reinforced hydraulic hoses, combined with the well proven products and high level of service, make JYM a reliable partner for your current and future secure supply!

**JYM– ALWAYS A RELIABLE PARTNER!**

# WHAT CAN WE DO?

**Best Service.  
Best Value.  
Best Advice.**

The hydraulic hose range is dedicated to hydraulic systems and equipment in many different sectors, such as construction machines, mining, industrial processes, agriculture, road construction equipment, drilling, forestry machines, material handling and lifting, road transportation, marine and offshore, and many others. High pressure hydraulics is a means to transmit, control and distribute energy and power using a pressurised liquid, most often oil and water-based fluids, as a medium.

Please note that the suitability of a chosen product for the customer's specific application can only be determined in individual cases and is dependent on the specific installation situation (especially the hose curvature), the combination with a coupling, and the compatibility of the medium with the inner surface of the hose (inner liner).

**Additionally: not suitable for aerial vehicles**

Please note: Before using our products with new or untested media, or for applications that are not clearly indicated in the product information, written advice must be obtained from a specialist dealer or a Semperit application engineer. For safety reasons, all products must be inspected regularly for operational safety and replaced in the event of any damage (especially of the cover) or unusual signs of wear and tear. All products must be stored, handled and maintained in accordance with all our respective instructions and DIN 7716:1982. The information in our catalogue as well as each individual datasheet is subject to change at any time without notice since we are constantly developing and improving our products and due to constant technical developments after the latest release date of the catalogue and/or individual datasheets. In order to always have the latest product and safety information make sure you visit our website ([www.jymfg.com](http://www.jymfg.com)) regularly or contact one of our specialist dealers. All contracts with JYM are exclusively subject to our general terms and conditions (available at [www.jymfg.com](http://www.jymfg.com)).

Important notice: Our catalogue and any individual datasheet have been prepared with great care in order to provide you with all the information you need. The information contained therein is based on the state-of-the-art industrial technology and many years of experience and testing; whenever indicated for a certain product, we also confirm conformity with the resistance requirements of the media indicated in the product catalogue. However, the individual conditions of storage, maintenance and use decisively affect the safe and durable use of each product. The quality and safety of our products as indicated in the catalogue or individual datasheets are therefore strictly subject to the continuous observance of all specifications and restrictions in our written product information, applicable laws and standards. We reject any liability for safety issues or other consequences due to improper product choice, maintenance or handling (e.g. squashing, rupturing, stretching or filling with non-approved media). Our products must not be used in airplanes or other aerial vehicles under any circumstance. Unless specified otherwise, all hoses are manufactured according to EN853, 856, 857 and SAE J 517.

Publication date: August. 2019

## **IMPORTANT INFORMATION:**

Incorrect product selection or improper installation of hoses can result in damage to or failure of the hose, (often serious) material damage, and personal injury. Particularly in applications with high operational pressures, non-compliance with specifications can result in a serious risk of injury! Therefore, in case of doubt, please seek specific advice!

## **GENERAL INFORMATION ON THE USE OF OUR PRODUCTS**

Please consult our home page [www.jymfg.com](http://www.jymfg.com) for further information in detail. This brief overview does not replace specific advice in individual cases.

**Please obtain specific advice in the event of any uncertainty!**

The number of potential operating hours decreases if the hose is used under unfavourable operating conditions. These include maximum operational pressure, maximum temperature, and minimum bending radius. When several of these factors coincide, the product deteriorates more rapidly and therefore must be replaced sooner.

Therefore please verify operating conditions regularly, and adapt your replacement cycle to them.

**WIRE BARID HOSE**

## EN853 1SN/SAE100 R1AT

**APPLICATION:**

Medium pressure hydraulic application including mobile, machine tool and agricultural application, using petroleum or water-based hydraulic fluids.

**TUBE:**

Oil resistant synthetic rubber.

**REINFORCEMENT:**

One high tensile steel wire braid.

**COVER:**

Abrasion and weather resistant synthetic rubber.

**TEMP. RANGE:**

-40°C to +100°C.

## SAE100 R13

**APPLICATION:**

Very high pressure applications subject to surge or flexing such as construction equipments, mining and the high performance industrial market.

**TUBE:**

High Temperature, High Impact synthetic rubber

**REINFORCEMENT:**

Four or six high tensile steel wire spiral layers.

**COVER:**

Abrasion and weather resistant synthetic rubber.

**TEMP. RANGE:**

-40°C to+120°C.

# HOSE PROTECTOR

## JYM-A-A FIRE SLEEVE

### DESCRIPTION:

Fire Sleeve is ideal for protecting against high under bonnet temperatures which makes it perfect for use on hoses, wiring, oil and fuel lines. The Sleeve is made from woven insulated glass fiber braided sleeve that is heavily coated with 100% iron oxide silicone rubber.

The Sleeve can withstand up to 1650°C ambient heat and 560°C of direct continuous heat which makes it perfect for insulating wires, oil and fuel lines from under bonnet heat.

### SIZE:

The Sleeve diameter used can be same size as the hose that it will fit. For example if the hose is 10mm outside diameter use a 10mm inside diameter fire sleeve. The sleeve is flexible, it can give some slack in the Sleeve to allow it to be bent and installed/removed easily.

### KEY FEATURES:

1. Oil and water resistant
2. Can be shaped to fit the tightest bends
3. Includes fire tape to seal sleeve ends
4. Glass fiber sleeve with silicone rubber coating. Perfect for insulating wires, oil & fuel lines. Protects against dirt and road grime.
5. Withstands up to 1650°C ambient heat.
6. Withstands 560°C of direct continuous heat

## JYM-A-B FIRE SLEEVE

### DESCRIPTION:

Using high temperature glass fiber thread, Fire Wrap 3000 is flame resistant with a hook-and-loop Velcro edge closure design that is sewn internally for a simple and easy installation.

Fire Wrap 3000 withstands repeated exposures up to 1650°F and 560°F of direct continuous heat providing an excellent insulation barrier as well as protection against burns while working around engine bays.

### KEY FEATURES:

1. Hook-and-loop Velcro edge for easy install withstands harsh abrasions, hot oil spills & more
2. Water & oil resistant
3. Protect against hydraulic fluids, lubricating oil & most chemicals
4. Durable & flexible for tight bends

## JYM-A-C FIRE TAPE

### FEATURES:

High temperature tape:made from Silicone coated fiberglass braided fire sleeve

### PRODUCT FEATURE:

Material is same as fire sleeve:E-fiberglass braided inside and silicone coated outside the heat resistant performance can be same as high temperature fire sleeve. Suitable used in larger diameter of the tubes or place of complex lines.

### APPLICATION:

Widely used in metallurgical equipment, industrial machinery,electronic appliances,electric products of high temperature,such as place of heat and insulation protection

### WORKING TEMP.:

Can continuous exposure to the high temperature of 560℃,and from being damaged under the high temperature of 1650℃,can withstand 15-30 seconds

### WIDTH:

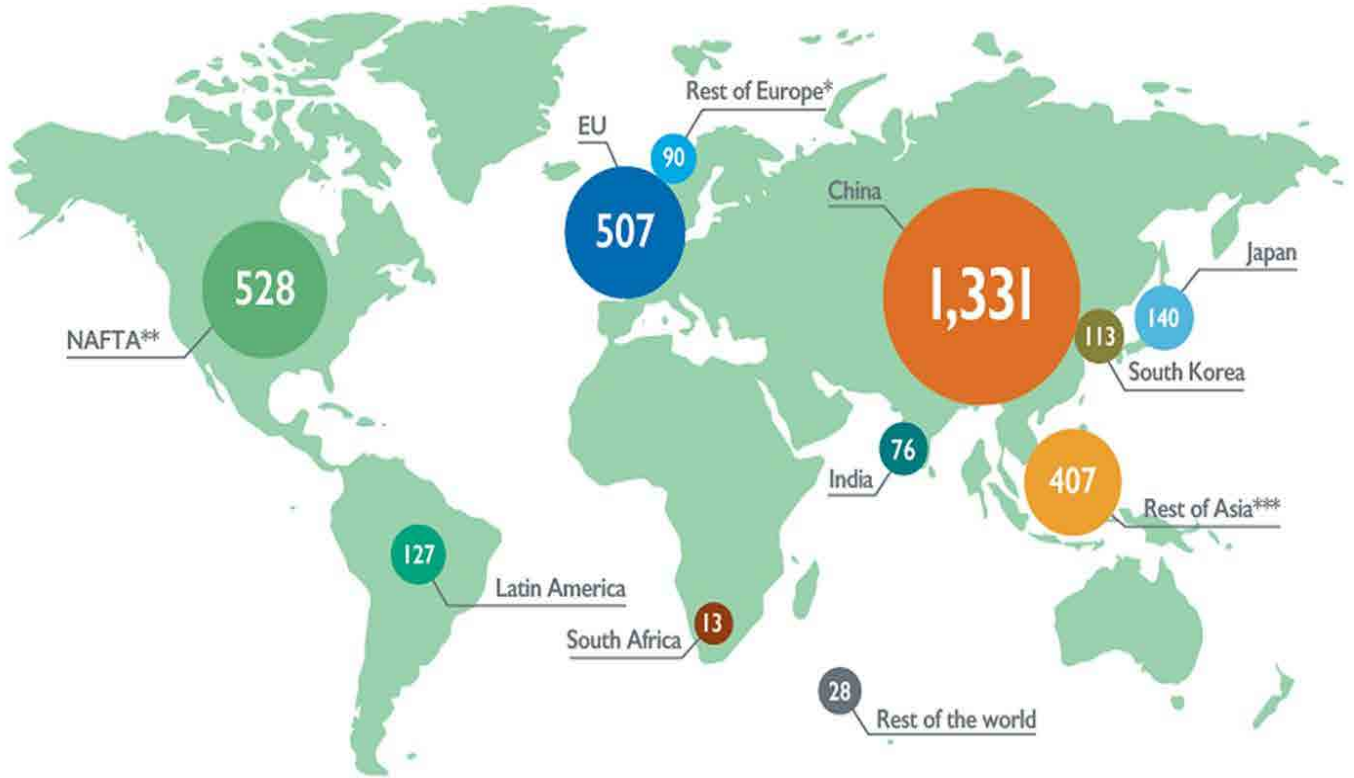

50-315mm

### LENGTH:

According to the site and customers requirements.
